Opis produktu

Simple Wireless Home Network Sharing and Connectivity

Benefits

Stable, reliable wireless connectivity for Web browsing, file exchange, media streaming and online gaming

Delivering wireless connectivity at speeds of up to 300 Mbps* with the 802.11n technology, the Zyxel NBG-418N v2 Wireless N300 Home Router is a wide-coverage wireless solution ideal for homes.

Compliant with 802.11n with data transfer rates of up to 300 Mbps

With wireless speeds of up to 300 Mbps* thanks to the 802.11n technology, the Zyxel NBG-418N v2 features bandwidth management that enables you to prioritize network traffics, making it ideal for streaming, online gaming and Web browsing throughout your home.

Two omni 5 dBi antennas for stable data transmission and wider coverage

With two omni 5 dBi antennas, the Zyxel NBG-418N v2 provides a wider wireless range for you to enjoy wireless services throughout the home network and even in your backyard. You'll enjoy stable, reliable wireless connections for Web browsing, file exchange and multimedia streaming everywhere at home.

WiFi Protected Setup (WPS) for quick, easy wireless security setup

The Zyxel NBG-418N v2 features WPS that allows users to quickly establish network security simply by pressing the WPS button
on the router.

Wireless scheduling

Save unnecessary power consumption and reduce wireless radiation when wireless connection is not in use.

Wireless output management

Easy to adjust the output power to reduce interference with neighboring access points within high wireless density areas.
